

The RotoDataPortal is a secure, in-house designed web application that allows you to view and track your tank inventory.

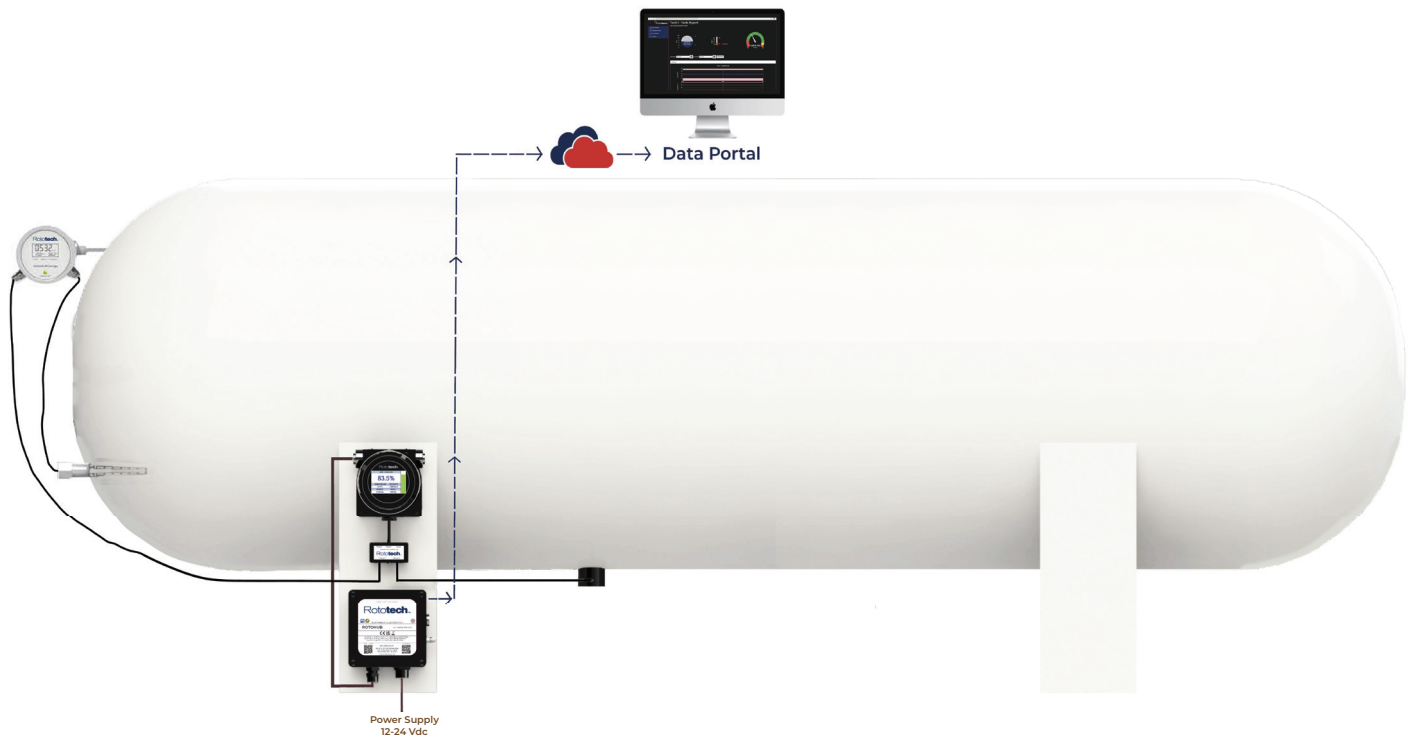

FEATURES:

- Simple user interface
- Custom UI
- View historical data and reports exports
- Easy to view summary of all your tanks in one place
- Available on any mobile, tablet or computer

BENEFITS:

- Long term investment
- Can be used with all RotoTechnology products for complete tank monitoring controls
- Real-time results
- View and manage inventory in one place
- Secure & reliable data

ONLINE DATA PORTAL:

Our products are all seamlessly connected to our Secure Online Data Portal via our ATEX/IECEx certified telemetry device (**RotoHub**).

Use of our Data Portal includes:

1. Remote Support

Our engineers are able to view the system 24/7 to resolve issues and/or provide automatic software or firmware updates.

2. Data Analytics

Our easy to use, secure online portal allows the user to monitor and control their tank inventory. Data is transmitted every 15 minutes ensuring real-time monitoring of level and temperature. The portal has ability to view historical data and set up various alarms for managing min/max limits.

3. Full Inventory Control

Depending which products are connected, our systems are able to provide liquid level, temperature, pressure, density and mass analysis in real-time.
